SUPREME ALUMINIUM

The Supreme Locker range is designed specifically for wet area use, which allows the locker to be exposed to wet or humid atmospheres for long periods of time such as leisure centres, swimming pools and spa changing rooms.

SUPREME ALUMINIUM

THE **SUPREME ALUMINIUM RANGE** is our most popular range for use in wet locations. The range provides a practical and cost effective alternative to more expensive stainless steel options. The range can be supplied in a range of colours together with several different locking options to meet your specific requirements.

The carcass is manufactured from one piece of 1.5mm aluminium flat sheet as used in the automotive industry 5754H22. Units are available at 1800 high as standard and range from 300mm to 450mm widths and 300mm to 450mm depths. As a manufacturer we can also offer bespoke locker sizes up to these maximums.

1-Tier lockers are fitted with a shelf and 2 coat hooks (one on the left and one on the rear centrally positioned). 2-Tier lockers are fitted with 2 coat hooks as standard (one on the left and one on the rear centrally positioned).

All Supreme lockers are manufactured from 1.5mm thick aluminium with Solid Grade Laminate doors. The doors can be either Plant On or Inset and are available in a wide range of colours from the Arpa, Formica, Greenlam or Poly Ray 10mm SGL colours.

Flat Top		Integral sloping top
1800 High x Wide x Deep (mm)	Nest 1	Rear Height (mm)
300 x 300	✓	1900
300 x 375	✓	1925
300 x 450	✓	1950
300 x 500	✓	1975
375 x 375	✓	1925
375 x 450	✓	1950
450 x 450	✓	1950

WET AREA LOCK OPTIONS

Cam lock with 2 keys

Hasp & Staple for padlock

Coin/Token Return Lock

Coin/Token Retain Lock

Electrical 10 Digit Lock

SUPREME ALUMINIUM

The Supreme Locker range is designed specifically for wet area use, which allows the locker to be exposed to wet or humid atmospheres for long periods of time such as leisure centres, swimming pools and spa changing rooms. Available in a 1 Tier up to a 6 Tier and also available in our Z Locker specification. Made to standard sizes within our range and bespoke sizes on request. Please note that these lockers can be manufactured only as a single nest.

Choice of tops

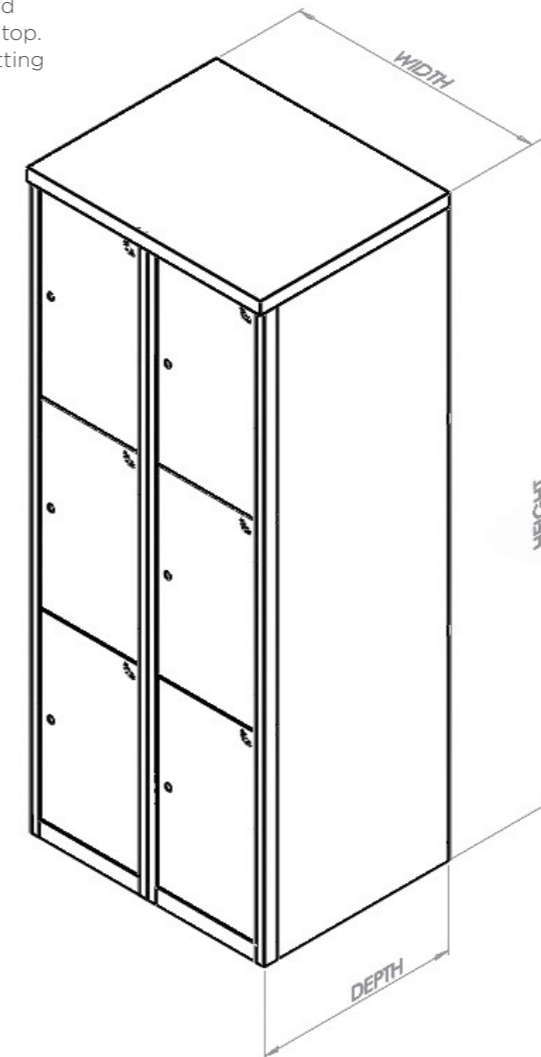

The Supreme Range are specifically for wet area use and can be supplied with either a flat or integral sloping top. Sloping tops help to discourage putting items on the top of the locker.

Versatility

Ideal for all areas with wash down and high hygiene requirements such as food processing plants, dairies, abattoirs and the pharmaceutical industry to name a few.

Fixings

All locker sides and backs are pre-pierced for bolting together (nesting). All nuts and bolts for fixing together are included in the price of the locker.

Cost effective

Provides a practical and cost effective alternative to more expensive stainless steel options.

Material

The carcass is manufactured from one piece of 1.5mm thick aluminium as used in the automotive industry 5754H22. Carcasses, shelves, tops and bottoms are powder coated in a textured silver grey.

Doors

Solid grade laminate doors available as plant on or inset. Plant on doors have self-cleaning wet area hinges. Inset doors have semi-concealed hinges.

Doors

Doors are manufactured from 10mm Solid Grade Laminate with bull-nosed edges and can be recessed for the application of a numbered disc if required. The doors are complemented with a range of wet area locks to choose from.
