Discover the best smart locking solution for

Pick-up & Drop-off

- Store and issue parcels and products 24/7
- Configure every lockerwall (partly) into Pick-up & Drop-off
- Automatic notifications and in-locker sensor options

The future of the Parcel/Rental locker is here.

By using a smart locker, your company or residential building can simplify the way parcels are delivered and collected. Keynius can grant your parcel company a one time access to the front door, and/or send you a notification when a parcel is dropped or collected. Using the system on an outdoor placed locker wall is no problem. Control by mobile phone is standard, but can be expanded with a touch screen and/or bar/QR code reader. The lockerwall can also be used for rental purposes, with advance or direct payment.

# Why is Keynius the best solution for your Pick-up & Drop-off?

1 Use locker walls in the most efficient way.

- Combine locker wall functions: parcel/product management, flexible personal storage, click & collect, rental and more.
- Monitor locker use real time
- Handle payments easily in advance or locally
- Automatic e-mail or SMS notifications
- Save on precious floor area
- Any courier can pick up or drop off a parcel

2 Multiple usage modes: Choose the best way(s) to configure and operate your lockers.

Keynius Locker configurations

- Parcel Locker
- IT & Asset Locker
- Click & Collect Locker
- Personal Locker
- Visitor Locker
- Employee Day Locker

Keynius smart locking control

- Touch screen (Smarty)
- QR/Barcode
- Fingerprint
- Pay
- Key card (RFID/NFC)
- App (Mobile/Tablet)
- Online (Mobile/Tablet)

3 Developed as one system: Matching hard- and software.

- Ultra-flexible and expandable
- Unique lock that can serve as both push2open and pop2open
- Additional hardware possibilities like code readers, payment module and in-locker sensors
- Cloud operated: safe, secure, automatically updated, no servers needed
- 3rd party software system integration (API) a.o. front door access control
- Suitable for outdoor use

USE CASE Olssen parcel locker, Sliedrecht (NL)

By using a smart locker, your company or residential building can simplify the way parcels are delivered and collected. Keynius can grant your parcel company a one time access to the front door, and/or send you a notification when a parcel is dropped or collected. Using the system on an outdoor placed locker wall is no problem. Control by mobile phone is standard, but can be expanded with a touch screen and/or bar/QR code reader. The lockerwall can also be used for rental purposes, with advance or direct payment.

Smart locking reinvented.

Keynius is the global new standard in possibilities for 'anything with a lock'. We invent and sustainably develop smart, innovative and high-tech solutions that are easy to operate and fun to use, to help companies become more profitable, help employees make their jobs easier, and help users to keep what is precious safe.
