

Discover the best smart locking solutions for

Hospitality

- Increase your turnover and customer satisfaction
- Best user experience: scan QR, fill in e-mail and ready to lock
- Add direct or advance reservation & payment options

Ultimate hospitality with excellent ROI.

A cosy dinner, a romantic night out, a beautiful show, a sparkling concert, an interesting exhibition or an exciting congress: first and foremost, visitors should feel welcome. This includes making sure they can store their personal belongings safe and convenient. For museums, cinemas, concert and conference halls, stadiums and (outdoor) festivals, the Keynius smart lockers are a great way to offer guests a super simple and highly secure storage solution, which they can easily book and pay for in advance or locally. But Keynius also opens up a world of inventive simplicity and smart, flexible options for locker administrators. And last but not least, the smart cloakroom lockers also save on personnel costs and pay for themselves even faster through (flexibly configurable) rental revenues.

Why is Keynius the best solution for your hospitality?

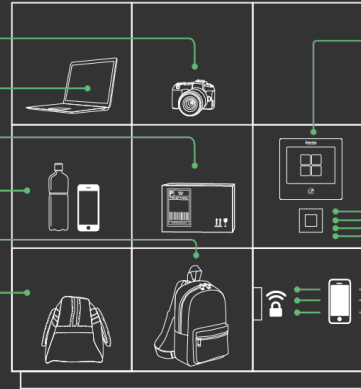

1 Use locker walls as a service and as a profit center!

- Let guests reserve and/or pay for lockers in advance via your own website.
- Monitor locker use real time for optimal usage
- Simple QR code scanning, fill in e-mail address, claim, (pay) and enjoy!
- Save on precious floor area
- Very good return on investment

2 Multiple usage modes: Choose the best way(s) to configure and operate your lockers.

Keynius Locker configurations

- Visitor Locker
- IT & Asset Locker
- Click & Collect Locker
- Personal Locker
- Team Locker
- Employee Day Locker

Keynius smart locking control

- Touch screen (Smarty)
- QR/Barcode
- Fingerprint
- Pay
- Key card (RFID/NFC)
- App (Mobile/Tablet)
- Online (Mobile/Tablet)

3 Developed as one system: Matching hard- and software.

- Ultra-flexible and expandable
- Unique lock that can serve as both push2open and pop2open
- Enhance locker cabinets with features such as USB 1.0/3.0 power connection, cabinet and/or door lights, RFID and more
- Cloud operated: safe, secure, automatically updated, no servers needed
- 3rd party software system integration (API)

USE CASE Paradiso Amsterdam.

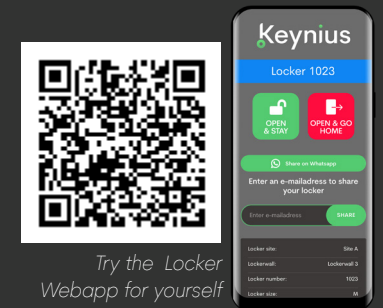

The famous pop podium Paradiso has made its cloakroom more efficient and profitable by placing Keynius controlled lockers. At different locations within the building visitors can easily pre-reserve or claim and pay locally for a locker and thanks to the webapp control, leave after a concert without queuing.

Smart locking reinvented.

Keynius is the global new standard in possibilities for 'anything with a lock'. We invent and sustainably develop smart, innovative and high-tech solutions that are easy to operate and fun to use, to help companies become more profitable, help employees make their jobs easier, and help users to keep what is precious safe.

We LOVE talking about all things SMART!
