

GARRAN

Aspria Harbour Club

Milano Project

Overview

Located in Milan, the Aspria Harbour Club Milano is a premium private members' health club that emphasises luxury and functionality. The project involved the design, manufacture, and installation of bespoke changing room and corridor furniture. The goal was to provide a seamless blend of aesthetics and practicality for male, female, adult female, and fathers' changing rooms, along with enhanced corridor utility spaces.

Objectives

Design, manufacture, and install custom furniture for changing rooms and corridors, ensuring a cohesive and luxurious experience.

Solution

The project focused on delivering bespoke furniture that combined form, function, and precision. By utilising premium materials such as HPL, stainless steel, and Corian, the designs ensure longevity, ease of maintenance, and a luxurious user experience. The use of stainless steel enhanced durability and added a modern, sleek aesthetic.

Method/process

To further support the design and planning process, 3-D modelling and photorealistic renders were created. These visuals allowed the client to preview the final look of the rooms with remarkable accuracy, providing confidence and clarity before work commenced. This forward-thinking approach ensured alignment with the client's vision and minimised potential adjustments during implementation.

This design philosophy seamlessly blended innovation and craftsmanship, resulting in a functional yet elegant environment that aligns with the premium standards of the Aspria Harbour Club Milano.

Key Features

02920 859600

1 Changing Rooms (Male, Female, Adult Female, and Fathers' Areas)

- **HPL Lockers:** Designed with high-pressure laminate (HPL) and steel-faced doors for durability and style.
- **Coffee Tables and Cubicles:** Matching bespoke designs integrate with the overall aesthetic.
- **Glass Display Cabinets:** Provide modern display solutions while maintaining visibility.
- **Corian Vanity Units:** Equipped with custom seating for added comfort.
- **Upholstered Benches:** Freestanding, with luxurious fabric for enhanced relaxation.
- **Towel Storage & Disposal Units:** Strategically placed for user convenience.
- **TV Housings:** Designed to integrate seamlessly with the locker rooms.
- **Illumination:** Fully illuminated areas ensure optimal visibility and ambiance.

2 Corridor Furniture

- **HPL Lockers:** Matching steel-faced doors and panel work for consistency with changing rooms.
- **Glass Display Cabinets:** Elegant, functional designs for utility and aesthetic value.
- **Laundry Attendants Counter Top:** Ergonomic and practical for staff efficiency.
- **Storage Units:** Associated units provide additional space for operational needs.

Results

The bespoke furniture installation successfully elevated the user experience in the Aspria Harbour Club Milano. Guests now enjoy a luxurious and functional environment that caters to the diverse needs of its clientele, from families to individual members. The corridor furniture further complements the changing rooms, ensuring a seamless transition between spaces.

Conclusion

This project exemplifies how thoughtful design and high-quality materials can transform a health club into a premium lifestyle destination.
