

PROJECT

Coventry and Warwickshire NHS Trust - SMART Lockers

A great success, our SMART Lockers efficiently installed across six Coventry and Warwickshire NHS Trusts.

The brief was to supply a locker system to manage the flow of IT equipment around the different Trust locations, reducing the need for personnel meeting face-to-face and to provide a secure place where items could be deposited and / or collected.

Working closely with the customer to meet the exact requirement we provided a total of 254 compartments of various widths and door configurations. Which allowed for storage of items from a mobile phone to a PC monitor.

Well done to everyone involved and to our James!
