

PROJECT

Wasps Rugby - Elite Performance and Innovation Centre

Wasps Rugby's new multi-million-pound centre at Henley-in-Arden is the new home of their rugby men's first team and academy. The new state of the art Elite Performance and Innovation facility, provides them with one of the finest training complexes in the English Rugby Premiership.

We are delighted that we were chosen to fit out the Players Changing Room. Garran Workspaces supplied and installed the lockers and bench seats with upholstered seat pads, along with all the dividers and infill panels required. The laminate colours were chosen to match Wasps specific pantone requirements.

The lockers are a totally bespoke design, with built in charging facilities in each locker. Thanks to Warwickshire-based development partner Wigley Building & Development for specifying us on the 4-million-pound construction project.
