

## PROJECT

FORDS Packaging Systems Limited

**FORDS** is a world leader in packaging innovation. Developing new design possibilities that are distinctive, durable, imaginative and sustainable.

For their Head Office we manufactured and installed a series of bespoke, hygienic protective screens together with our brand-new Dual sit stand bench system. Using our innovative technology and working solutions, they have achieved the perfect working environment - designed to enhance employee wellbeing.

### Testimonial

*We worked with Garran to provide our new desk and chair solutions. We knew we wanted sit/stand desks due to the many health benefits and Garran were superb in listening and understanding our requirements and sourcing a great solution for us. They provided CAD drawings based on our preferred new office layout and were happy to work with us and to tweak these layouts until we were entirely happy. The installation was very smooth and efficient and the new desks and chairs have really given the office a sleek and professional feel and people love the option of being able to customise the height and sit or stand as preferred. The communication with Garran was great throughout and I'd highly recommend them for any workspace requirements. Gillian Plummer, Chief of Staff.*
